

NOW YOU HAVE AN INTRAORAL SCANNER

WHAT'S NEXT?

Now that you have the technology available, it's time to unleash its full potential

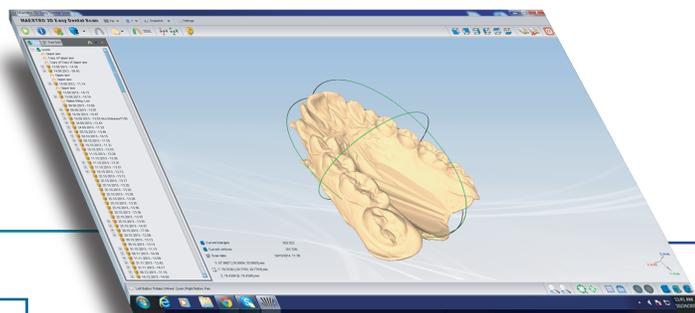

USING YOUR INTRAORAL SCANNER TO FABRICATE APPLIANCES HAS NEVER BEEN EASIER.

Now you can eliminate the hassle of shipping impressions that come out distorted and unable to be worked on.

Sending your STL file is fast and easy. Just send us the file and our lab technicians will evaluate the file and begin fabrication process. A 3D model will be printed from our 3D printers and creation of appliance will start right after printing is done.

Let us help you in your next appliance purchase. Our top staff will gladly assist you in your process towards a new appliance from a STL file.

By using this service, you are contributing to a green alternative. This process greatly reduces emissions to the Earth's surface by reducing shipping transportation. Not only is this service a great choice to fabricate appliances, but is also a better choice for the environment.

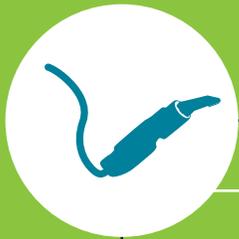

5 EASY STEPS!

Having your appliances fabricated in our state of the art laboratory has never been easier. Working with our laboratory will help aid in getting your appliances on time. Eliminate the hassle of rescheduling appointments for new impressions due to distorted impressions.

Now simply scan your patient and send over the patient's .stl file over a secure network. There is no need to wait for delivery of an impression. The moment we receive the file, we begin fabrication, greatly reducing time for the appliance to be finished.

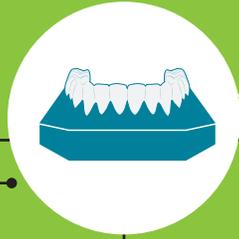

We can assure you that working with Universal Orthodontic Laboratory, we will upgrade your service as well as the quality of craftsmanship in your new appliances due to our highly skilled technicians. There is no need to wait any longer. Call us today to start using our service and our helpful staff will be more than happy to assist you.

Scan patients mouth using your intraoral scanner.

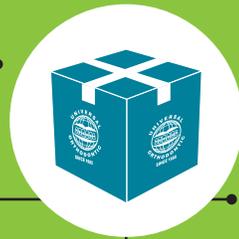

Send your STL files to Universal Orthodontic Lab.

Our technicians will print out a 3D model from the STL file you provided.

Appliance fabrication will begin immediately after 3D printout using your specifications you stated.

Your new appliance will be shipped and delivered back to you.
